Newcastle, NSW

PROFILE

My experience is in building software products end to end. In the last two years, I have designed and delivered several production-ready applications through my own studio, using modern development frameworks and languages. Before software, I was a trade-qualified carpenter and spent over a decade building multi-million dollar construction projects, managing teams, working with clients and delivering on time and to budget.

EXPERIENCE

AppHouse (apphouse.com.au)

2024 – Present

Full Stack Developer / UX Designer

Founded a micro-SaaS studio where I independently handle every stage of product development — user research, UX design, front-end and back-end engineering, database architecture, authentication, payment integration, cloud deployment, SEO and marketing. Each product is built from a blank repo to a live, production application serving real users:

MAINS (getmains.com.au)

Infrastructure connection design & quoting platform

- Designed full UX for a complex canvas-based drawing tool with live distance measurements and interactive map overlays
- Built with Google Maps API, PDF report generation, AI-powered proposals, multi-region support
- Currently in pilot phase with industry partner

ThemeForge (themeforge.dev)

AI-powered RGB keyboard theme generator

- Researched niche community needs, designed and built interactive keyboard visualisation with AI theme generation
- 100/100 Lighthouse performance score; 20+ users with zero marketing spend
- Concept to production in 14 days

Cluera (cluera.io)

Review intelligence platform for Etsy sellers

- Designed and built a full SaaS product from zero — brand identity, UX, AI analysis pipeline, and automated email reporting system
- Built with Next.js, Supabase, Stripe, and Anthropic AI; deployed on Vercel
- Sub-$300 AUD total build cost including domain, hosting, and API tokens

Lindens Painting and Decorating

2021 – Present

Team Lead & Painter

Working with high-end clients in the horse breeding industry around Scone. I manage the team, talk directly with clients about what they want, and make sure we deliver quality work on time. Did this full-time while completing my degree.

NRW Holdings & Whitten's Group

2019 – 2021

Leading Hand Carpenter

Led teams of 30+ people on major infrastructure projects including bridges and mine facilities. Worked closely with engineers and surveyors. Got projects finished ahead of schedule while maintaining zero safety incidents.

Various Construction Companies

2010 – 2017

Carpenter & Project Coordinator

Worked on everything from schools to aged care facilities. Handled my own projects from start to finish — quoting jobs, ordering materials, managing client relationships, and doing the actual work.

SKILLS

Design

User Research, User Flows, Information Architecture, Wireframing, Prototyping, A/B Testing, Usability Testing, Visual Design, Responsive Design, Design Systems, Component Design, Typography

Development

React, TypeScript, Next.js, Node.js, HTML, CSS, Tailwind CSS, JavaScript, Python, Swift, SQL, PostgreSQL, Git, API Development & Integration, OAuth, Stripe, Supabase, Vercel

Tools

Figma, Adobe Creative Suite, VS Code, Xcode, Git, Vercel, PostHog, AI-Assisted Development (LLMs, prompt engineering), Miro, Axure

Ops & Delivery

End-to-End Product Delivery, Team Leadership (30+ crews), Client Management, AI-Augmented Workflows, Cost Estimation & Quoting, Agile Workflows, Cross-Discipline Collaboration

EDUCATION

Bachelor of UX & Web Design

Torrens University

2022 – 2024

Diploma of UX & Web Design

Torrens University

2020 – 2022

Certificate IV in Building and Construction

NSW TAFE

2014 – 2016

Certificate III in Carpentry

NSW TAFE

2010 – 2014
